PROJECTS

1. E-Commerce Product Landing Page

Personal Project

Technologies: HTML, CSS, JavaScript

- Designed and developed a responsive product landing page for an e-commerce store.
- Implemented product showcase, image gallery, and Add-to-Cart functionality using JavaScript.
- Ensured mobile-first design with smooth animations and transitions.
- Achieved fully responsive layout compatible across all major devices and browsers.

2. Weather App

Personal Project

Technologies: HTML, CSS, JavaScript, OpenWeather API

- Built a real-time weather application that fetches live data using OpenWeather API.
- Users can search for any city to view temperature, humidity, and weather conditions.
- Implemented dynamic UI updates, error handling, and loading states.
- Designed a clean and responsive interface for a seamless user experience.

3. To-Do List Application

Personal Project

Technologies: HTML, CSS, JavaScript

- Developed a dynamic to-do list application to manage daily tasks efficiently.
- Implemented Add, Delete, Edit, and Mark as Complete functionalities.

- Used Local Storage to persist tasks even after page refresh.
- Focused on clean code, modular JavaScript, and responsive design.

4. Interactive Portfolio Website

Personal Project

Technologies: HTML, CSS, JavaScript

- Created a personal portfolio website to showcase skills, projects, and contact information.
- Implemented smooth scrolling, navigation menu, and contact form with validation.
- Optimized performance and ensured cross-browser compatibility.
- Deployed using GitHub Pages for live access.
